FIRMWARE 2.04 RELEASE NOTES   (HW2 ONLY)

OVERVIEW

Fixed a couple outstanding bugs and added support for real-time clock.

Refer to the 2.00 Release Notes if you are currently upgrading from 1.xx firmwares. This only describes changes from the previous version.

FULL CHANGES

1. Fixed DMA write functionality with some SD cards.
2. Fixed timeout bug with standalone SI operations.
3. RTC (over SI channel) is implemented for use with Dobutsu no Mori.

HOW TO UPGRADE

First, check to see what firmware version you currently have, by opening the "About" tab in the 64drive menu.

- **You have 1.00-1.05:**
  You must upgrade using the **Easy Upgrader**, or the **command line USB Loader 1.xx** tool.
  Refer to the 2.00 Release Notes for instructions on how to use the command line tool.

- **You have 2.00-2.03:**
  Simply copy the "64drive_firm_204.rpk" file from the website onto your memory card.
  Load the file in the menu as if you were starting a game, and your firmware will be upgraded.
  You should have at least Menu 1.12c for this method.

  Alternatively, you can use the command line USB Loader 2.xx tool to upgrade via USB.
